About me

Adaptable software development professional, skilled in various data structures. Committed to continuous learning, thriving in both collaborative and independent settings. Dedicated to delivering top-tier quality work and exceeding expectations.

Experience

Software Developer

LightHub Digital Jun - Aug 2023

- Architected sophisticated ASP.NET applications with C# to elevate client and business operations, demonstrating a commitment to cutting-edge development.
- Developed databases using SQL, enhancing company data infrastructure for seamless efficiency and management.

Database Developer

TOCO Currency Nov 2022 - Jan 2023

- Developed an online database using QuickBase to track and manage customer information and recent sales.
- Wrote and maintained technical and functional specifications to document database intentions and requirements.
- Modified databases to meet needs and goals determined during planning process.

Education

(2019-2021) Bachelor of Computer and Information Science

Independent Institute of Education, Varsity Collage Durban, South Africa
